

## Community Resilience Self-Evaluation

**Instructions:** This tool is intended to help organize your community’s approach to increasing resilience to natural hazards and climate change impacts. Answer the questions to the best of your knowledge and seek information from your colleagues in municipal and county government and organizations in your community. Provide any relevant information in the explanation field. If it is difficult to give a clear yes or no response to a question, use the explanation field to explain why. **There are no wrong answers and the responses here will not affect your community’s eligibility to receive grants.** Where the response to a question is no, that may indicate an area of opportunity to address through a Community Action Grant.

|   |   |
|---|---|
| <b>Community name:</b>  | Town of Farmington  |
| <b>Self-Evaluation responses provided by:</b><br>Please include contact info                        | Cindy Gelin<br><a href="mailto:cgelinas@farmington-maine.org">cgelinas@farmington-maine.org</a><br>778-5874 |
| <b>Date:</b>  | 09/06/22  |
| <b>Was this evaluation discussed during a community workshop?</b> Include the date of the workshop. | Yes. 08/30/22   |

Once the questions on the following pages are complete, use these prompts to identify potential next steps for your community:

|  |   |
|--|---|
| <b>What are two things your community is doing well?</b>                 | We have a Code/Planning department that is managing growth in Farmington through the administration of its Zoning and land use ordinances. The Town is planning for the future through its Comprehensive Plan, which is approved by the State through 2027. |
| <b>What are two areas that could be improved in the short-term?</b>      | Affordable housing, and traffic management and quality for roads.   |
| <b>What is important for your community to address in the long-term?</b> | Broad band  |
| <b>What specific 3 to 5 actions are priorities for your community?</b>   | Community Building HVAC system, Broad band, roads, LED lighting for Municipal facilities, and electric vehicle charging stations.   |

| Minimizing Risk and Exposure to Hazards   |   |
|---|---|
| <b>1) Has your community assessed the likelihood of various types of hazards or disruptive events?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| Your local or county hazard mitigation plan is a good starting place to find this information. Hazards can include storms, floods, wind, fire, extreme temperatures, drought, etc. Likelihood could be indicated either numerically or qualitatively as low, medium, or high. | Explanation: The Town has a Hazard Mitigation Plan and All-Hazards Plan. High/Medium –severe winter storm, flooding, and erosion.   |
| <b>2) Has your community assessed how the likelihood of each hazard has changed over time and may change in the future?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| If your community has not tracked trends historically, you might infer past trends by determining if current priorities have shifted compared to past hazard mitigation plans. For example, drought or wildfire might be an emerging concern.                                 | Explanation: The trends have stayed the same.   |
| <b>3) Has your community assessed the impacts or consequences of each type of hazard for the community?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| For example, flooding on Main Street impedes emergency services or affects local businesses.  | Explanation: The Town’s Hazard Mitigation Plan addresses all the above listed hazards.  |
| <b>4) Is your community taking steps to reduce exposure to multiple risk types?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| Your local or county hazard mitigation plan probably contains this information.   | Explanation: The Town has ordinances in place to address and reduce the exposure to multiple risks.   |
| <b>6) Is your community preparing for low-probability-but-high-consequence events?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| These events could be, for example, a 1-in-100-year flood, or a prolonged electricity outage or heating fuel shortage. What events might the community need to consider?  | Explanation: The Town has backup generators for emergency facilities, mutual aid agreements with multiple organizations and towns, National Weather Service warnings, and participates in FEMA/CRS. |
| <b>7) Has your community assessed the consequences of multiple events or different types of hazards occurring in geographic or temporal proximity?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| Examples could include back-to-back flooding events or a power outage during a heat wave.   | Explanation: The Town has emergency shelters, and coordinates with federal, State, and County agencies.   |
| <b>8) Is your community assessing emerging risks (e.g. drought, wildfire) and identifying blind spots?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No   |
| In addition to natural hazards, consider public health threats that might be worsened by climate change, such as contamination of drinking water sources and vector-borne diseases from ticks and mosquitos.  | Explanation: The Town coordinates with federal, State and County agencies on these matters. The Village Corporation has installed two new reservoirs.   |

| <b>Understanding Sensitivity and Building Resilience</b>   |   |
|--|---|
| <b>9) Is your community tracking underlying societal characteristics and trends that increase vulnerability?</b>   | <input checked="" type="checkbox"/> <b>Yes</b> <input type="checkbox"/> <b>No</b>   |
| This information might be found in your community’s comprehensive plan or economic development plan. Examples of characteristics and trends might include older or low-income populations, low housing availability, reliance on a single economic driver, aging infrastructure, environmental degradation, etc. | Explanation: The Town has seen an increase in the older population. The Town has a shortage of available elderly, low-income, and subsidized housing. The Town continues to coordinate with several agencies to alleviate the shortage. |
| <b>10) Is your community proactively addressing vulnerabilities associated with these underlying characteristics?</b>  | <input checked="" type="checkbox"/> <b>Yes</b> <input type="checkbox"/> <b>No</b>   |
| Look in your community’s comprehensive plan or economic development plan for strategies that might address these trends.   | Explanation: The Town’s Zoning Ordinance encourages development of affordable housing, and single and duplex housing is allowed in every zone which are only subject to setback requirements and MUBEC.                                 |
| <b>10) Does your community have financial resources in reserve to cope with or absorb shocks?</b>  | <input checked="" type="checkbox"/> <b>Yes</b> <input type="checkbox"/> <b>No</b>   |
| For example, a rainy-day fund.   | Explanation: Farmington has a healthy unassigned fund balance.  |
| <b>12) Is your community building flexible human capacity that can be drawn on in emergencies?</b>   | <input checked="" type="checkbox"/> <b>Yes</b> <input type="checkbox"/> <b>No</b>   |
| For example, community emergency response teams (CERT) or mutual aid agreements with neighboring communities.  | Explanation: The Town of Farmington has mutual aid agreements with neighboring Towns and the State.   |

| Improving Long-term Adaptive Capacity   |  |
|---|--|
| <b>13) Does your community have plans or policies that anticipate future climate risks and community sensitivity trends?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  |
| Examples might include a comprehensive plan chapter that describes how the community is planning for climate change impacts, or a capital improvement plan that requires construction projects to consider future conditions like sea level rise, extreme rain, or drought.   | Explanation: Section 11 of the Town's Comprehensive Plan addresses the Capital Investment Plan, and we are currently working on updates to the Plan.   |
| <b>14) Are there resources to sustain new capacity when needed?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  |
| This is different from Question 10 in that these resources would need to sustain a new long-term commitment rather than a one-time, short-term response. For example, if flooding emerges as an issue, a revenue source such as a stormwater utility fee could sustain a new community stormwater management program. | Explanation: The Town's Waste Water Treatment Facility (WWTF) is built to accommodate 1.2 million gallons/day and it currently accepts flows of 400,000 gallons/day, therefore it has additional capacity. The Town charges an impact fee for sewer connections, which provides sustainability for the WWTF. |
| <b>15) Does the community have policies in place to build back smarter or recover with resilience after a disruptive event?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  |
| Examples might include a flood ordinance that requires compliance with the current building codes after substantial damage, or a communitywide post-disaster recovery plan.   | Explanation: The Town has a Floodplain Management Ordinance and MUBEC.   |
| <b>16) Does the community stress test to ensure plausible risks are manageable?</b>   | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  |
| This might be a table-top exercise with emergency management and community stakeholders, or a financial health analysis.  | Explanation: The Town departments along with County and State agencies have conducted exercises. The Town has auditors and accountants monitoring its finances.  |
| <b>17) Does the community have a policy or process for managing uncertainty?</b>  | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  |
| Does the community have a way of making important decisions when information is incomplete or unavailable?  | Explanation: Per the command structure in The All-Hazards Plan Section XIV.  |
